

COVID-19 – COVISENS

Hello everyone,

Last school semester, we as 3S students have been busy with the COVISENS project, organized by NanoBio for 3S cluster COVID-19. We have decided to organize a symposium / final presentation at the end of this semester where we would like you to be present. With the help of a presentation and a clip, we can show you what we have done during this semester and what we have achieved with our work (practical, theoretical, interviews).

It will all take place on Thursday January 21 at 4:00 PM. We hope to see you then!

With best regards,
COVISENS group

The future
is here
