

Future Tourism

Sustainable Holiday Parks

Sustainable Holiday Parks has worked on developing a website including a barometer with which holiday parks can measure and improve their own sustainability and circularity.

Connecting Veluwezoom

Connecting Veluwezoom has worked hard for client Ben Denekamp to “connect” the Veluwezoom and its experience areas. A lot of research has been done into the experience areas and new routes have also been realized to give visitors a choice in various, relatively unknown areas of the Veluwezoom. The entrepreneurs around the Veluwezoom (area from Wageningen to Brummen) will benefit greatly from the project and will be brought together.

Sustainable Marina Eindhoven

The challenge of adapting a marina in a sustainable way to make it future proof!

Sustainable Marina Eindhoven 2

Finding innovative solutions to attract new potential customers to Marina Eindhoven.

Experience the channel group 1

Our project is about making the Apeldoorns channels touristic destination and a lifeline between the cities. We created tourism zones along the channel and a platform for entrepreneurs and tourists to use for sales and information.

Experience the channel group 2

A roadmap for our client to increase the tourism frequency in the region of the Apeldoorns Canal. Based on thorough research and inventive recommendations.

The future is here
